

Google Chrome Issue with Displaying Calendars on School Website

If you get this when you try to click on the link for any of the calendars on our school website:

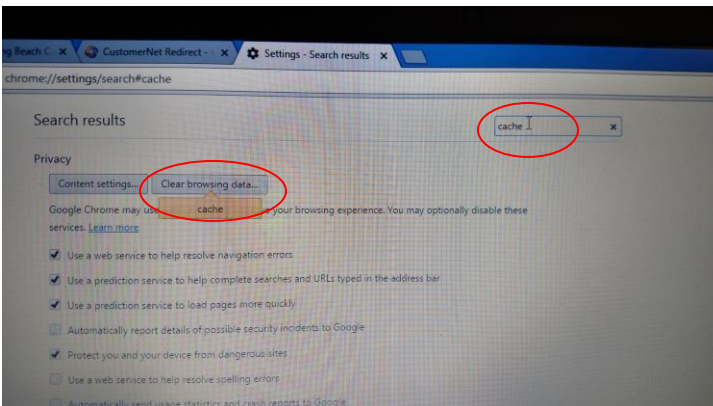

You will need to clear your browser cache and then refresh the page. You *should* only have to do this once and the issue will be resolved. A recent Calendar update that cannot be reversed in causing this, but there is a solution.

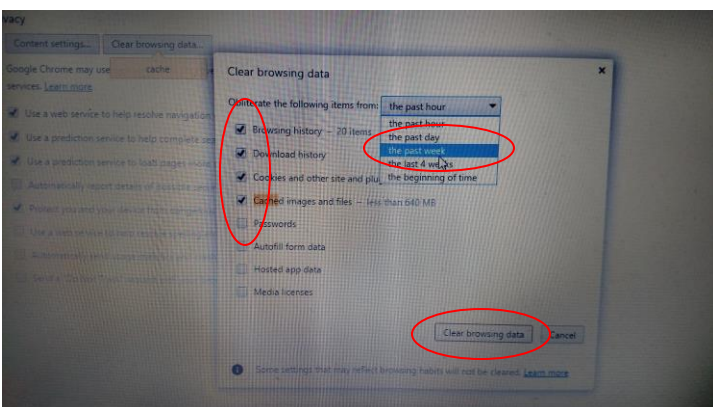

How to Clear Browser Cache:

Click on the 3 dots in upper right hand corner and then select Settings.

A new window will open. In the search box in the upper right hand corner, type CACHE. Options will automatically pop up. One of the blue buttons will say Clear Browsing Data. Select that!

Make sure the top 4 boxes have check marks. From the drop down menu, select either the 'past day' or 'past week', to clear the browsing history. Click "clear browsing data" and then refresh the page and the calendar will appear.
